COLLEGIATE DEPARTMENT.

COURSE OF STUDY.

FRESHMEN.

FIRST SESSION.

Sallust.
 Latin Grammar (Bullions') reviewed.
 Arnold's Latin Prose Composition.
 Græca Majora, vol. 1st.
 Greek Grammar, (Bullions') reviewed.
 Arnold's Greek Prose Composition.
 Algebra, (Davies' Bourdon)

SECOND SESSION.

Cicero's Orations.
 Græca Majora, vol. 1st.
 Arnold's Latin and Greek Prose
 Composition.
 Algebra, (completed.)
 Geometry, (Davies' Legendre.)

SOPHOMORES.

FIRST SESSION.

Horace.
 Græca Majora, vol. 2d.
 Geometry, (completed.)
 Trigonometry, Plane and Pherical.

SECOND SESSION.

Cicero de Oratore.
 Orations of Demosthenes.
 Blair's Rhetoric.
 Mensuration of Surfaces and Solids.
 Surveying and Navigation, (Davies.)
 Analytical Geometry, (Church's.)

JUNIORS.

FIRST SESSION.

Tacitus, (Germania and Agricola.)
 Sophocles, (Antigone.)
 Logic.
 Political Economy.
 Analytical Geometry.
 Chemistry, (Silliman's.,

SECOND SESSION.

Plautus.
 Æschylus, (Prometheus.)
 Mental Philosophy.
 Mineralogy, (Dana's.)
 Botany, (Wood's.)
 Natural Philosophy—Mechanics, Hy-
 drostatics, Pneumatics, Acoustics,
 (Olmsted's.)

SENIORS.

FIRST SESSION.

Greek Testament,
Cicero de Officiis,
International and Constitutional Law,
Zoology,
Natural Philosophy—Electricity, Magnetism, Optics (Olmsted's.)

Portions of Greek & Latin reviewed.
French,
Moral Philosophy, (Wayland's.)
Evidences of Christianity,
Geology,
Astronomy,

Declamation and English Composition throughout the course.

In place of the Greek language, two modern languages may be substituted, and the student admitted to the usual collegiate degrees. In this case, however, an extra fee of \$10 per session will be charged.

Ollendorff's series of Grammars in Modern languages will be used; and in Latin, Greek and English, Bullions' series has been adopted.

SCIENTIFIC COURSE.

This course has been arranged for the accommodation of those not desiring to pursue the entire college course. It will embrace three years, and those who complete it, will be entitled to a certificate from the Trustees and Faculty.

FIRST YEAR.

FIRST SESSION.

Algebra, (Davies' Bourdon.)
Chemistry, (Silliman's.)

SECOND SESSION.

Algebra, (completed.)
Geometry, (Davies'.)
Mineralogy, (Danas'.)
Botany, (Wood's.)
Rhetoric, (Blair's.)

SECOND YEAR.

FIRST SESSION.

Geometry, (completed.)
Trigonometry, (Plane & Spherical.)
Logic.
Political Economy.

SECOND SESSION.

Mensuration of Surfaces & Solids.
Surveying and Navigation.
Analytical Geometry.
Natural Philosophy—Mechanics.
Hydrostatics, Pneumatics,
Acoustics, (Olmsted's.)

THIRD YEAR.

FIRST SESSION.

Mental Philosophy, (Upham's.)
 Zoology.
 Natural Philosophy—Electricity,
 Magnetism, Optics.
 Analytical Geometry.

SECOND SESSION.

Moral Philosophy.
 Evidences of Christianity.
 Geology.
 Astronomy.

DEPARTMENT OF THE PHYSICAL SCIENCES.

The same attention as heretofore will be paid to Chemistry, Natural History and Geology. As Prof. Safford has been called to the Geological survey of the State of Tennessee, the Board of Trustees has elected Mr. W. J. Craw, formerly of the Analytical Laboratory of Yale College, assistant Professor, to supply the temporary vacancy. Students who may desire it, will have an opportunity of accompanying Prof. Safford in his excursions—a course we highly recommend to those pursuing such studies.

Much time has been devoted to the collection of suitable Cabinets of Minerals and Fossils, in order that the studies of Mineralogy and Geology may be rendered useful and practical. The collections already made are not surpassed by any in the South West.

The apparatus is amply sufficient for the illustration of all important principles and facts in Chemistry and Natural Philosophy. Such additions will be made as our necessities may require.

PREPARATORY SCHOOL.

COURSE OF STUDY.

FIRST YEAR.

Orthography.
 Reading.
 Penmanship.

Geography.
 Mental Arithmetic.
 (Colburn's.)

SECOND YEAR.

Geography.
 Reading.
 Penmanship,

Mental Arithmetic.
 English Composition.
 Declamation.

THIRD YEAR.

Arithmetic.
 English Grammar,
 Latin Grammar, (Bullions'.)
 Latin Reader.
 Arnold's First Latin Book.
 Greek Grammar, (Bullion's.)
 Greek Ollendorff.

Geography, (reviewed.)
 Latin Reader, (continued.)
 Greek " (Bullions'.)
 Declamation.
 English Composition.

FOURTH YEAR.

Arithmetic.
 Greek Grammar.
 Ancient Geography.
 Cæsar's Commentaries.
 Virgil.
 Physiology.

Davies' First Lesson's in Algebra.
 Greek Reader, (continued.)
 Geometry.
 Book Keeping.
 Composition.
 Declamation.

For advanced standing, the candidate must be prepared to pass a satisfactory examination in the previous studies of the class he proposes to enter.

Students should present themselves for admission at the beginning of the session.

The Preparatory School will open the next session with increased facilities for instruction. In addition to the teachers formerly employed, the Trustees have engaged Mr. HUBERT MERRILL, of New York, a graduate of the Norman School at Albany. This will give still greater efficiency to the department; and the Trustees have full confidence that, for discipline and instruction in the English branches, as well as in the Latin and Greek classics, the School will be found not inferior to any other in the State.

TERMS OF ADMISSION.

Candidates for admission into the Freshman Class, must be prepared to sustain an approved examination on English Grammar, Arithmetic and Geography; on the Latin and Greek Grammars, the introductory books of the Latin and Greek courses, including Latin Reader, Cæsar's Commentaries, Virgil, and Bullions' Greek Reader, or other Greek and Latin authors equivalent to these; and on Algebra, as far as through equations of the first degree. Some preparation in Geometry, though not *required*, is highly important, and *earnestly recom-*

mended. Davies' elementary works on Algebra and Geometry are the best for preparation to enter the Freshman Class.

A candidate for advanced standing, whether from another College or not, is examined in the various branches to which the class he proposes to enter has attended. Students who, from want of means, or from other considerations, desire to pursue an irregular course, may do so, with the consent of their parents or guardians. Applicants for admission are required to present testimonials of good moral character; and, if from other colleges, certificates of good standing and regular dismission.

TUITION FEES AND OTHER EXPENSES.

Tuition fees of the Preparatory School, per session of five months, are as follow:

For the First Class,	- - - - -	\$8 00
For the Second Class,	- - - - -	10 00
For the Third Class—English Course,	- - - - -	12 50
For the Third Class—Latin and Greek,	- - - - -	15 00
For the Fourth Class,	- - - - -	15 00
Tuition Fee in College, per session, for Freshman		
and Sophomore classes,	- - - - -	20 00
Junior and Senior classes,	- - - - -	25 00
Boarding, including lodging, washing, fuel, and		
lights, per week, in town,	- - - - -	2 50
In the vicinity,	- - - - -	1 50 to 1 75
Room rent in College building, per session,		3 00

A fee of one dollar and a half per session is paid by each student for contingent expenses.

There are some minor expenses, which result from taxes voluntarily imposed by Classes, or Societies. In other incidental expenses, if money is furnished, or permission given to contract debts, a student may be extravagant. To guard against this, it is earnestly recommended to all parents and guardians, not to authorize the obtaining of credit, unless under the special supervision of some friend. Boarding can be procured at the above prices in the most respectable families in the place.

The fees for tuition must, in all cases, be paid in advance, and a receipt obtained from the Treasurer to be presented to the Clerk of the Faculty. Those entering under scholarships and as ministers or candidates for the ministry, will obtain from the Treasurer certificates of that fact, which will also be presented to the Clerk of the Faculty. Without such certificates, or some other satisfactory arrangement with the Faculty, no student will be permitted to recite. The Trustees will hold the Faculty responsible for the tuition fees of those who may be admitted to recitation in violation of this provision.

SESSIONS AND VACATIONS.

The Collegiate year is divided into two sessions. The winter session begins on the third Monday in September and terminates on the third Thursday of February. The summer session begins on the following Monday, and terminates on the second Thursday in July—which is Commencement day.

ADVICE TO PARENTS AND GUARDIANS.

1. When you send your son or ward to the University, signify in a letter to the President whether he is to take a regular or irregular course; and if the latter, what particular branches he is to study. This will prevent those frequent and pernicious changes so common with boys left to their own will. A regular course is earnestly recommended to all whose circumstances will permit them to take it; but, if such be the desire of the parents or guardians of students, any particular branch of literature or science will be taught; but each student must have his whole time occupied.

2. The occasions should be very rare that you should consent for your son or ward to leave the University, during the sessions, on visits home, or otherwise. This is apt to be allowed during the Christmas holidays, without sufficient regard to the effect it may have on the studies the whole session. The Faculty generally allow a few days at Christmas for recreation—as much time as they think it safe for the students to lose from their studies.

THEOLOGICAL DEPARTMENT.

REV. RICHARD BEARD, D. D., was inaugurated Professor of Systematic Theology on the 13th of March last. Shortly thereafter a Class was organized which has received daily instruction in the Greek and Hebrew Scriptures, and other branches of Theology. Dr. BEARD also delivers weekly lectures on Systematic Theology to all the Probationers in the College, about thirty in number. Rev. D. LOWRY and President ANDERSON still continue their lectures on other subjects embraced in the course.

The Board has three agents in the field, soliciting funds for the endowment of the Department. Rev. W. D. CHADICK, in nine months, has secured not less than twelve thousand dollars. No report has been received from the other agents.—The Board entertains no doubt of the ultimate success of the enterprise. It is highly important that at least two Professorships should be endowed during the next Collegiate year, and funds likewise obtained for the purchase of a library. It is hoped, therefore, that the Church will promptly and liberally respond to the calls of the Agents. As a Theological School is now established, Presbyteries should encourage their probationers to avail themselves of its advantages, and, when necessary, furnish them with adequate means.

SCHOOL OF CIVIL ENGINEERING.

THE COURSE OF STUDY EMBRACES

MATHEMATICS.	{	Algebra, [Davies' Bourdon]
	{	Geometry, Trigonometry and Mensuration, [Davies' Legendre]
	{	Surveying, [Davies' Revised Ed.]
	{	Descriptive Geometry, [Davies']
	{	Shades, Shadows and Perspective, [Davies']
	{	Analytical Geometry, [Church's]
ENGINEERING.	{	Differential and Integral Calculus, [Church's]
	{	Roads and Rail Roads, [Gillespie]
	{	Civil Engineering, [Mahan]
	{	Bridge Construction, [Haupt.]
	{	Draughting, use of Compass and Chain, Theodolite, Level and Transit.

The whole of the above course, is recommended to students intending to become engineers. Those who desire it, may confine their attention to so much of the course as will qualify them for land surveying, or for teaching the Mathematics.

The instruction will be made as practical as possible.

On entering this School, students will be classed according to their advancement. From two to three years will be required to complete the whole course of study, by those who have made little or no preparation; from one to two years by those more advanced. Those who complete either the course of Mathematics, or that of Engineering, or both, will receive certificates of the fact, signed by the President of the University and the Professor of the school.

The tuition fee is \$30 per session, and must be paid in advance. No part of it will be refunded, but a deduction will be made when a student enters more than two weeks after the beginning of a session.

A fee of one dollar and a half per session will be charged for contingent expenses.

The students in this school will be subject to all the laws of the University regulating conduct and morals, and to those prescribed for the government of resident graduates.

A competent assistant will be employed, whenever his services shall be needed. Sessions the same as in College. Applications for admission or information should be made to Prof. Alex. P. Stewart.

UNIVERSITY.

OUR PROSPECTS AND APPEAL.

Ten years have elapsed since the institution was chartered, and at no former period in its history have its prospects been more flattering than at present. It has, from its first organization to the present time, enjoyed a liberal share of public patronage. <The constant aim of the Board of Trustees has been to maintain a Faculty of unquestioned competency; and they flatter themselves that in this respect, the institution may challenge a favorable comparison with others.> They trust, therefore, that they may now confidently appeal to its friends to rally to its support with renewed spirit and energy. This will ensure success.

But, though, in view of the past, there is much that is encouraging, yet much still remains to be done, to give it that full measure of usefulness and prosperity to which it should aspire. The Library and Apparatus should be enlarged. The maintenance of Professors should be secured against contingencies. To accomplish these ends, we call upon the friends of education, and especially upon the advocates of an intelligent and efficient ministry, and upon the church which began and has thus far so liberally fostered the enterprise, to give it all the aid that is necessary, to effect the most perfect success.

The dissimilarity of the manners, customs and institutions of the different sections of our vast Republic, now presents to parents the important question, whether the interest of their children does not require that they should be educated among the people with whom they will have to act their parts in life, rather than among those with whom they will have no more to do after the signing of the diplomas. It is a fact well known to all observers, that the sentiments and feelings originating during the period of collegiate life, are apt to guide in manhood. It is also admitted by all that a man's success, in a government like ours, depends very much upon the adaptation

of his manners and feelings to those of the people with whom he acts. This is next, if not equal in importance to the attainment of a thorough education. It is true, that in times gone by, the facilities for education were so much greater in the North, and in Europe, that the South and West felt constrained to send off their sons, as it were, among a strange people, to make scholars of them. This is not so now. **L**The Trustees of this institution feel fully authorized to say to the people of the South and West, that they have a Faculty and system of instruction in Cumberland University, that will compare favorably with any institution in the United States. **>** They feel well justified in saying, that there is no longer any necessity for encountering the disadvantages of sending their sons and means abroad in search of literary knowledge. They can now, if they choose, bring up the young men of our country among their own people, and amidst the institutions and customs of their forefathers, and thereby continue them to their posterity. Surely it behooves us to take care of ourselves in this as well as all other great interests. Had we not better, as a section, strengthen, consolidate, and perpetuate our own seats of learning, by the concentration of all our patronage, than to leave them to dwindle and die, by bestowing our means upon those at a distance from us? We would not engender hostility to the institutions or the people of the North; but we would encourage a vigorous competition and manly independence, in literature as well as in all other great interests of our section of the Union.

ALUMNI

OF

CUMBERLAND UNIVERSITY.

✂ The Degree of Master of Arts has been conferred on all those who are entitled to it.

*Deceased.

LEBANON LAW SCHOOL.

This School has now been in operation seven years, and has educated more than three hundred young men for the bar. A greater number has attended it this, than any former year. It may, therefore, be assumed that its administration has been approved by the public, and especially by the legal profession. For no Law School can command respectable success without the favorable opinion of that enlightened and influential body. Many causes, no doubt, have concurred in producing this favorable opinion, and this steadily increasing prosperity.

It was the first attempt to establish a Law School in Tennessee, and therefore seemed to have a claim on the sympathies of the State. It was considered a hazardous experiment. The newspaper press, generally, sustained it. Prominent members of the bar and bench encouraged the effort. In the fifth year of its existence, it had attained the rank of the second Law School in the Union, in point of numbers. It was no doubt felt that this fact constituted a strong appeal to the pride of the State, to give it a more earnest and united support, and advance it, if possible, to a still higher position.

The peculiar advantages of its location have been duly appreciated. Lebanon is a village destitute of those attractions which, in a city, are constantly beguiling students from their studies. There are not more than six or eight weeks of court here in the year. There are no political assemblies, except such as are common to every town in the State. A constant succession of courts, conventions, legislatures, theatrical and other exhibitions, combined with unlimited social attractions, would present temptations to indulgence that few law students could resist. The disadvantage of surrounding himself by such beguilements at the critical period of intellectual development, can hardly be over-rated by the student. It is only by diligent application to study that he can qualify himself for the bar, and the fewer temptations he has around him to relax his application, the more sure he will be to succeed.

Another cause has worked favorably. Two of the professors are devoted exclusively to the School. They attend to no official or professional business. This fact presents the fullest assurance that the business of instruction will be well attended to. It is impossible that professors can do any sort of

justice to students, and at the same time practice law. To conduct a Law School, or any other School, or any other valuable business, successfully, must employ the time and talents of those who are engaged in it, fully and laboriously. To deliver daily lectures of an hour or two is easy, and would interfere but little with the professional business of the lecturer; but it would be as unprofitable to the students as easy to himself.

Another feature in this School which has doubtless commended it to the favorable consideration of the public, is the moral and religious influence which it exerts on the young men who attend it. As the bar must ever wield an extensive influence on the moral character of the community, it is of the utmost public importance that its own moral character should be pure and elevated. It is therefore a prominent object in the administration of this School, to cultivate the morality of the class. This is effected in various ways:

1. *By Discipline.* Laws are enforced against immoralities with a stringency that commands respect, and yet with a leniency that quiets all murmuring, and commands the cheerful acquiescence of the class.

2. By occasional lectures, urging the study of the Bible, attendance upon the Sunday Schools, and the strict observance of those rules of conduct by which alone solid character can be formed and preserved.

3. As intemperance has been found to be the source of almost every irregularity, a law has been enacted during the present year, which provides, 1st, That no student shall drink intoxicating liquors at all, as a beverage. 2d. That no student shall enter a drinking shop for any purpose whatever. 3d. If a student gets drunk he shall be dismissed. For the two first offences such milder punishment is inflicted as the Faculty may think proper. This law is based upon the principle, that the student who can sacrifice all the endearments of home in order to attend the School, and yet cannot sacrifice the bottle for the short time he remains here, is not likely to do himself or the School any credit. If he esteems his drain of more importance to him than the advantages of the School, there is no hope of redeeming him. By excluding all such from the School, its elevated moral tone is preserved.

4. The influence of the local society is very salutary. Wherever a Law School may be situated, that influence will be powerfully felt. In Lebanon it is altogether on the side of virtue. The whole weight of society is actively exerted against intemperance, gambling, and vice in every shape. Students

board in private families, and are thus brought under the constraining influence of family associations. They are from the very nature of their pursuits brought more into contact with lawyers than any other class. These are nearly all members of some Church. The demoralizing agencies which do exist here, are not invested with those attractive forms, and countenanced by that social influence, which render them dangerous to aspiring young men.

5. The plan of instruction keeps the class too busy for immoral indulgencies. The daily recitations and Moot Court exercises, are sufficient to employ all the time, thought and energy of the student, and if he is not willing to occupy an inferior station in his class, he has no idle hours to spend.

MOOT COURTS.

Two Circuit Courts, or one Circuit and one Chancery Court, are held on every Monday, in which the Professors preside in different apartments. On the last Friday in every month a Supreme Court is held, in which one of the Professors, associated with two of the senior students, presides. These Courts have the same jurisdiction and observe the same law of practice, as the Courts of the same name in Tennessee.

The exercises in these Courts do not consist in merely debating questions of law. But cases are announced in various forms to each student, on which he is to bring a suit, and another is appointed to defend it. There is a regular clerk and sheriff; the students, however, perform the duties of these officers in their own cases. The plaintiff's attorney gives his prosecution bond, issues his writ with the name of the clerk signed to it, makes the proper returns on it in the name of the sheriff, files his declaration, and keeps his own docket, besides having the case entered on the clerk's docket. He then hands his papers to the defendant's attorney, who examines them, and moves to dismiss the suit, or pleads in abatement, or demurs or pleads in chief. If he fails to make defence in proper time, the plaintiff takes judgment by default against him. If the plaintiff fails to reply, or at any time take the necessary step to prosecute the suit, he is *non prossed* by the defendant.

When the cause is ready for trial, a jury of the students is empannelled, the cause is regularly submitted to them, the evidence on each side is introduced, the cause argued, the jury is charged by the court, and render their verdict. Judgment is rendered and execution issues. On these executions returns are directed to be made in some cases that will subject the sheriff to summary judgment, and the plaintiff is required to

move against him and his sureties, and adduce the official bond and the other evidence that may be necessary to sustain the motion, and then to enter the judgment on his minutes. In other cases delivery bonds are given; in others indemnity bonds; in others one of the parties dies, and in fine the various cases are so directed as to involve all the varieties of practice that arise on executions.

In other cases motions for new trial are made and overruled, and an appeal taken to the Supreme Court, an appeal bond given, a bill of exceptions filed, and the record regularly transferred to that Court, where the judgment is affirmed, or reversed and remanded for a new trial.

Equity cases are in like manner announced, and suits commenced and carried through all the processes known to the Chancery Court, such as references to the Clerk and Master, final and interlocutory decrees and appeals to the Supreme Court.

In some cases suits are commenced before Justices of the Peace, and brought into the Circuit Court by appeal or certiorari, and tried there.

Sometimes a regular *Venire Facias* is returned as from the County Court—a grand jury organized and charged by the Court, State cases given to students in which they act as Attorneys General, prepare indictments, have them regularly passed upon by the grand jury, and carry them through all the processes of a criminal prosecution, an advocate being always appointed to defend.

Cases are so framed as to put the student under the necessity of preparing the various kinds of instruments that are used in the transactions of men. Letters of administration, wills with proper certificates of probate, deeds duly proved and registered, promissory notes, marriage licenses, &c., &c. He is obliged to introduce them as evidence to sustain his suit or defence.

A Moot Court is held at the close of each collegiate year in public, which excites great interest among the students and greatly attracts the community. Until the close of the last year this was a Supreme Court, exercising its appellate jurisdiction. But it was then a Circuit Court, and the trials were before juries selected from among the students, and involved interesting questions of fact and of law. In this court as well as in all the other exercises of the School, forms of proceeding are from time to time modified in such manner as best to answer the essential ends in view.

The advantage of this Moot Court system is, that it not only indoctrinates a student in the elementary principles of law in-

volved in his cases, but also in the law of remedies. It trains him also to the discussion of facts, and to the exercise of that tact which is so important in real practice.

COURSE OF STUDY.

The School is divided into three classes, Junior, Middle and Senior. It will require three sessions of five months each to graduate, unless a student is advanced when he enters, and then he will be admitted into that class, for which he may be found qualified. The reason for reducing the time required for graduation is, that we have found by seven years experience that comparatively very few will remain in the School four, or even three sessions. A much greater number will remain three sessions if they can graduate in that time, and thus the School will send to the bar a greater number more thoroughly prepared than it can do by requiring a more thorough course.

Junior Class.

The principal book of the Junior session is *Kent's Commentaries*. To prepare for this, *The History of a Law Suit*, *Hilliard's Elements*, *Stephens' Pleading* and selections from *Blackstone*, are studied.

Middle Class.

Story's Equity Jurisprudence and
Equity Pleading.
Story on Promissory Notes.

Greenleaf's Evidence.
Wharton's American Criminal Law.

Senior Class.

Chitty on Contracts,
Williams on Executors,
Bell on Husband and Wife,

Greenleaf's Cruise's Digest,
Story on Conflict of Law,
Story on the Constitution,

TERMS OF ADMISSION.

No previous professional reading or literary qualification is required for admission. Those who may apply for advanced standing will be examined on the text already studied by the class which they may propose to enter, if they intend to take a regular course. If, however, they do not enter with a view to graduation, they are not examined on their previous reading, but are allowed to enter what class, and study what books they choose.

EXPENSES.

The tuition fee is \$50 per session, to be paid invariably before admission. A proportional deduction is made when the student enters at an advanced period of the session, except for the first week. No part of the fee is refunded on any account; but a due allowance may be made for sickness or approved absence, to be deducted from the students' own admission fees for any subsequent session. Boarding is from \$40 to \$50 per session, including washing, fuel, rooms, and every necessary incident.
